Dear ASML,

I'm excited to be applying for the Software Integration Engineer position at ASML. As a highly competent Software Integration Engineer, I believe I would be a good addition to the team.

Working in my current job at Bosch Global Software Technologies Vietnam, I've about 10 years of experience in large-scale Automotive Multimedia software. Working as a Specialist Integrator, I have been responsible for developing and managing the CI systems, which delivery daily software to thousand developers and testers in Europe and Asia, of the project. Me and my Integration team collaborate to many development and testing teams to make the integration process works correctly. I've good skills in Git, Gerrit, Jenkins, Linux, Windows, C++, Python.

I've tried my best to contribute to my current and previous companies. I've got some rewards for my good jobs. I've some onsite working experiences in USA (2015) and India (2017) also.

Thank you very much for taking the time to review my application. I've attached my CV also. I'm excited about the opportunity to be a member of your company and hope to contribute to yours.

Thank you,

Vo Hung Tuan
